### 4. FIRST AID MEASURES

SKIN: Immediately remove contaminated clothing and shoes. Rinse affected area with mild soap and large amounts of water until no evidence of product remains. Get medical attention if irritation persists. Wash clothing before reusing.

EYES: Immediately rinse eyes with plenty of clean, flowing water, occasionally lifting upper and lower eyelids. Flush for at least 15 minutes. Get immediate medical attention.

INHALATION: Immediately move affected person from area of exposure to fresh air. Treat symptomatically and supportively. Get medical attention or contact a local poison control center. If breathing has stopped, give artificial respiration and get immediate medical attention.

INGESTION: Immediately seek medical attention. Maintain airway and respiration. Do not induce vomiting. If vomiting occurs, keep head below hips to prevent aspiration. Dilution by rinsing the mouth and giving water or milk to drink is generally recommended. **Do not attempt to give anything orally to an unconscious person.** Treat symptomatically and supportively.

**FIRE-FIGHTING INSTRUCTIONS:** Move containers from area if you can do so without risk. Keep upwind and avoid breathing vapors. Use extinguishing agents suitable for surrounding fire. Do not scatter spilled material with high-pressure water streams. Dike fire-control water for later disposal. Wear proper full protective equipment (Bunker Gear) and a self-contained breathing apparatus (SCBA) with full face piece operated in positive pressure mode.

**UNUSUAL FIRE AND EXPLOSION HAZARDS:** Negligible fire hazard when exposed to heat or flame. However, if ammonia gas is evolved, it is flammable.

### 6. ACCIDENTAL RELEASE MEASURES

Stop spill or leak if you can do so without risk. Ventilate area and keep upwind of spill. Close off area to traffic. For small spills, take up with sand or other absorbent material and place into clean, dry containers. For large spills, dike far ahead of spill to contain for later disposal. Cover collection containers and remove from area for disposal as regulations permit (See Section 12).

### 7. HANDLING AND STORAGE

Store away from incompatible materials and excessive heat (See Section 10). Do not mix with other household or industrial chemicals such as bleach, toilet bowl cleaners, wall or tile cleaners.

### 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

**VENTILATION:** Provide local exhaust ventilation system to meet established exposure limits where ammonia vapors are likely to approach or exceed exposure limits.

**RESPIRATORY PROTECTION:** Air contamination monitoring should be conducted where fumes or vapors may be released or generated. If respiratory protection is required, wear a NIOSH/MSHA approved respirator appropriate for the type of contaminants and the contamination levels found in the workplace.

**GLOVES:** Wear chemical-resistant gloves where prolonged or repeated skin contact may occur.

**EYE PROTECTION:** Splash-proof safety goggles should be worn where eye contact is likely to occur.

**OTHER PROTECTIVE CLOTHING OR EQUIPMENT:** Wear impervious protective clothing where splashing and repeated or prolonged contact may occur. Eyewash facility recommended in work area or in close proximity.

**PROTECTIVE WORK/HYGIENIC PRACTICES:** No special requirements with respect to chemical workplace exposure beyond those noted above. Specific requirements with respect to equipment and applications are the responsibility of the handler/user.

CHEMICAL STABILITY: Stable under normal temperatures and pressures.

CONDITIONS TO AVOID: Contact with incompatible materials.

INCOMPATIBILITY WITH OTHER MATERIALS: Chlorine, hypochlorite, acids, and metals.

HAZARDOUS DECOMPOSITION PRODUCTS: Thermal decomposition may produce corrosive vapors of ammonia and toxic oxides of nitrogen.

HAZARDOUS POLYMERIZATION: Has not been reported to occur under normal temperatures and pressures.

### 11. TOXICOLOGY INFORMATION

The acute health effects described below are those, which could potentially occur for the finished product. They are based on the toxicology information available for the finished product and /or each hazardous ingredient, and are consistent with the product type and the likelihood of a specific route of exposure. Known chronic health effects related to exposure to a specific ingredient are indicated.

EYE EFFECTS: May cause eye irritation with severe pain, closure of eyelids, and corneal injury.

SKIN EFFECTS: Repeated, prolonged or occluded contact may cause various severities of skin irritation.

ACUTE ORAL EFFECTS: May cause pain and burns to mucous membranes, the esophagus and stomach, with vomiting and diarrhea.

INHALATION EFFECTS: Ammonia vapors may cause upper respiratory irritation with coughing and sneezing, olfactory fatigue, labored breathing, and pulmonary edema.

CHRONIC EFFECTS: None known for the product.

### 12. ECOTOXICOLOGY INFORMATION

TOXICITY: This product is acutely toxic to aquatic life.

PERSISTENCE: This product is not expected to persist in the environment.

BIOACCUMULATION: This product is not expected to bioaccumulate.

Ammonia has been found to be acutely toxic, to numerous aquatic species, at low exposure concentrations (~ 1 mg/L). Chronic exposure to lower concentrations may impact the growth and reproduction of aquatic plants and animals. Aquatic toxicity is largely dependent upon pH, which dictates the amount of undissociated NH<sub>3</sub>.
